

DARE TO DIAGNOSE!

Who: SUGAR® is a valuable Certification, now available for healthcare professionals of all types — doctors, nurses, nutritionists, dietitians, physical therapists, addiction counselors, health educators, naturopaths, personal trainers, coaches, social workers, obesity and mental health specialists, etc.

What: SUGAR® diagnostic assessment is the most powerful tool available worldwide to aid clients in understanding and accepting the complex condition of food addiction. It helps overcome denial and significantly increases motivation and compliance among those who assess as food addicted. For those who score as not (yet) addicted, it identifies the potential for a moderation-based treatment approach. You can become Certified and Licensed to provide this important assessment service in as few as three months. The course includes video and reference resources that will prepare you to expand your existing services or launch your own private practice.

- *Help clients suffering from Sugar/Food Addiction.*
- *Add a profitable new revenue source to your practice.*

When: SUGAR® Certification Training is open to new participants year-round, on a rolling basis. Begin whenever you like and finish at your own pace.

Where: This online course is held live, via Zoom, with self-study and homework assignments between sessions.

How: The Certification course fee is just \$3,075 (USD); this includes your first year of SUGAR® Licensure at a 50% discount! Click [here](#) for more information or visit www.bittensaddiction.com. Click [here](#) to register!

Taught by Bitten Jonsson, renowned trainer of Sugar Addiction Counselors with nearly 40 years of experience.
